

Technical Bulletin #3
Frequency Report
REVISED: February, 2012¹

This Technical Bulletin provides information on how to interpret the Adoption and Foster Care Analysis and Reporting System (AFCARS) frequency report and how to install and execute the AFCARS Frequency Report Utility, Version 2.1.

Appendix B. Adoption Frequency Report35

¹ Initial issuance date May, 2007 as Technical Bulletin #14.

I. Introduction

A. AFCARS Background

AFCARS is designed to collect uniform, reliable information on children who are under the responsibility of the title IV-B/IV-E agency for placement, care, or supervision. The collection of adoption and foster care data is mandated by section 479 of the Social Security Act (the Act). The requirements for AFCARS are codified in Federal regulation at 45 CFR 1355.40. Effective October 1, 2009, section 479B(b) of the Act authorizes direct Federal funding of Indian Tribes, Tribal organizations, and Tribal consortia that choose to operate a foster care, adoption assistance and, at Tribal option, a kinship guardianship assistance program under title IV-E of the Act. On January 6, 2012, the Administration for Children and Families (ACF) issued an Interim Final Rule (IFR)² to implement statutory provisions related to the Tribal title IV-E program. The Federal regulations at 45 CFR 1355.40 were amended to apply the same regulatory requirements for data collection and reporting to a Tribal title IV-E agency as are applied to a State title IV-E agency.

AFCARS was established to provide data that would assist in policy development and program management. Data can be used by policymakers at the Federal, Tribal, and State levels to assess the reasons why children are in foster care and to develop strategies to prevent their unnecessary placement into foster care. Specifically, the data include information about foster care placements, adoptive parents, and length of time in foster care, and make it possible to identify trends in particular geographic areas. Also, the data enable the Children's Bureau to administer the Federal title IV-E foster care and adoption assistance programs more effectively. The Children's Bureau and ACF use these data for a number of purposes, including:

- responding to Congressional requests for current data on children in foster care or those who have been adopted;
- responding to questions and requests from other Federal departments and agencies, including the General Accounting Office (GAO), the Office of Management and Budget (OMB), the Department of Health and Human Services' Office of Inspector General (OIG), national advocacy organizations, States, Tribes, and other interested organizations;
- developing short and long-term budget projections;
- developing trend analyses and short and long-term planning;
- targeting areas for greater or potential technical assistance efforts, for discretionary service grants, research and evaluation, and regulatory change; and
- determining and assessing outcomes for children and families.

Additionally, the AFCARS data are used specifically in the

- Adoption Incentives Program;

² 77 FR 896 (January 6, 2012)

- Child Welfare Outcomes Report;
- Child and Family Services Reviews (CFSRs);
- Title IV- E Eligibility Reviews; and
- Allotment of funds in the Chafee Foster Care Independence Program (CFCIP).

B. Overview of the Technical Bulletin

As part of technical assistance to title IV-E agencies, the Children's Bureau has available three utilities that title IV-E agencies can run on their AFCARS data. The utilities are:

- Frequency
- Data Compliance
- Data Quality

This Technical Bulletin describes the title IV-E agency AFCARS Frequency Report Utility provided by the Children's Bureau. It provides examples of how to read the frequency report and how to use it to monitor the accuracy of the title IV-E agency's data. Additionally, instructions are provided on how to install and execute the utility.

The Frequency Report Utility was created as part of the ongoing technical assistance provided to title IV-E agencies by the Children's Bureau for AFCARS. The Frequency Report Utility produces aggregate reports for both the AFCARS adoption and foster care data. These reports will be most useful to child welfare program staff to help them assess whether or not the data collected on children in foster care and those who were adopted are reasonably accurate and valid.

This utility will yield the most information when run on a "raw" AFCARS data file that has not yet undergone data quality control checks. From the raw AFCARS data file, the Frequency Report Utility produces a report which lists the "frequency" or number of children's records for each type of response reported for each AFCARS element. The Frequency Report Utility reports all of the actual responses, whether or not these responses are valid AFCARS values. The report also includes what percentage each frequency is of all the actual responses, including the invalid or missing responses. Finally, this utility reports the mean and the median for some data elements (e.g., number of placement settings, amount of monthly adoption subsidy). The appendices include examples of an adoption and a foster care frequency report.

The Data Compliance Utility (DCU) and the Data Quality Utility (DQU) also are available to title IV-E agencies on the Children's Bureau's website. We recommend that title IV-E agencies use these utilities to review the AFCARS data on an ongoing basis and prior to submitting the data file to the Federal AFCAR System. When a title IV-E agency uses all three utilities to analyze and correct any problems in the AFCARS data, the title IV-E agency may have more confidence that the AFCARS data accurately reflect the child welfare program operations and meet the AFCARS data standards.

If there are questions on how to execute any of these three utilities, contact the Children's Bureau at afcars@acf.hhs.gov.

II. Using the Frequency Reports

A. General Considerations

As a first step in reviewing data, the frequency report is useful because it provides the person reviewing the AFCARS data with a quick overview of the number and type of responses being generated. By reviewing the frequency response to a particular data element, a person can assess whether the information is an under- or over-reported count, if there are too many missing responses, or if there appear to be problems with data entry. This review may trigger further investigation of specific problems in the data, and a more detailed report can then be generated with the DQU.

Each report contains a heading identifying it as either a foster care or adoption file and the appropriate AFCARS report period. The body of the report contains each of the element number and name above four columns of information (see Exhibit 1). The first column identifies the AFCARS value, the second column lists the number of records or "frequency" for that value, the third column lists the percentage, and the fourth indicates the cumulative percentage. Each row consists of the appropriate AFCARS value or dates. Additionally, there are rows that show the totals for not reported (missing data), records that have data reported, the total number of records submitted, invalid data (if applicable), and the means and medians (not all elements have the means and medians calculated).

Exhibit 1

Foster Care Element #07: Child's Sex

Value	Frequency	Percentage	Cumulative Pct
1 Male	1792	55.02	55.02
2 Female	1465	44.98	100.00
Not Reported	0	0.00	
Reported	3257	100.00	
Total:	3257		

The following information should be considered when reviewing the frequency reports:

- Total number of records

The total number of records equals the number of children served during the report period. It is necessary to know the AFCARS requirements for each data element before reviewing the frequency reports. For instance, some elements will have valid missing data. This is because information on some elements is not required until after a specified time has passed. Exhibit 2 is an example of how missing or "Not Reported" data can still be valid. In this case, the unreported data represent

children who do not have a TPR (termination of parental rights) date.

Exhibit 2

Foster Care Element #47: Mother's Parental Rights Termination Date

Value	Frequency	Percentage	Cumulative Pct
1987	1	0.03	0.03
1988	3	0.09	0.12
1991	4	0.12	0.25
1992	7	0.21	0.46
1993	5	0.15	0.61
1994	14	0.43	1.04
1995	6	0.18	1.23
1996	15	0.46	1.69
1997	6	0.18	1.87
1998	34	1.04	2.92
1999	40	1.23	4.14
2000	51	1.57	5.71
2001	58	1.78	7.49
2002	178	5.47	12.96
Not Reported	2835	87.04	
Reported	422	12.96	
Total:	3257		

- **Invalid Data**

For each AFCARS element, excluding those requiring a date, there are values that are used to respond to the AFCARS question. For instance, for a child's sex, the only acceptable values are "1, male" or "2, female." If the response to the element is a "3," it will be listed below the valid AFCARS values as "invalid data." This information must be corrected by the title IV-E agency. If it is not corrected, then the Federal AFCAR System will label this information as "missing data."

- **Dates**

For data elements that include dates, the frequency report provides a summary of the frequencies for each year reported to AFCARS. The report does not include the day and month. The invalid category for date elements describes out-of-range dates such as February 30 or March 32. Dates that occur in the future are also listed as invalid.

- **Dollar Amounts**

For those elements that require a monthly payment, the amounts are categorized in various dollar increments. This is to minimize the length of the frequency report. Exhibit 3 is an example of dollar amount groupings.

Exhibit 3**Foster Care Element #66: Amount of Monthly Subsidy**

Value	Frequency	Percentage	Cumulative Pct
0-	99	3.04	3.04
1-100	0	0.00	3.04
101-200	0	0.00	3.04
201-300	107	3.29	6.32
301-400	229	7.03	13.36
401-500	1028	31.56	44.92
501-750	97	2.98	47.90
751-1000	0	0.00	47.90
1001-2000	44	1.35	49.25
2001-5000	738	22.66	71.91
Over 5000	915	28.09	100.00
Not Reported	0	0.00	
Reported	3257	100.00	

Total: 3257

Median: 2438

- Means and Medians

The definition of each is:

Mean: Describes the average value calculated as the sum total of all of the reported valid values, divided by the total number of responses. **Note:** The mean is calculated for foster care element #19, "total number of removals" and #24, "total number of placement settings."

Median: Describes the number in the middle of a set of ordered numbers: that is, half the numbers have values that are above or greater than the median, and half have values that are less. Otherwise known as the 50th percentile, the median is a better descriptor of the mid-point of a set of values when there are very high or low extreme values. **Note:** The median is calculated for foster care elements #19, "total number of removals"; #24, "total number of placement settings"; #66, "amount of monthly subsidy"; and adoption element #36, "amount of monthly subsidy."

- Percentages

For each AFCARS value or date, the percentage of responses for that value are calculated as a percentage of the total number of reported cases. In addition to individual percentages for each response, there is a cumulative percentage. This adds together the percentage of each response. If an element has no missing data, then the total cumulative percentage will equal 100 percent. See Exhibit 4 below for an example.

Exhibit 4**Foster Care Element #55: Hispanic Origin (2nd Foster Caretaker)**

Value	Frequency	Percentage	Cumulative Pct
0 Not Applicable	2340	71.85	71.85
1 Yes	66	2.03	73.87
2 No	812	24.93	98.80
3 Unable to Determine	39	1.20	100.00
Not Reported	0	0.00	
Reported	3257	100.00	
Total:	3257		

- Total, Reported, and Not Reported

The frequency report will include the number of records that were “not reported,” “reported,” and the “total.” The “not reported” number was added to provide a quick summary of those records that were blank. For those elements that contain no missing data, the frequency for “not reported” will equal zero and the “reported” frequency will equal the overall total number of records submitted.

B. Interpreting the Frequency Reports*B-1. General Analysis*

Review each individual data element to assess whether the numbers being reported for each value seems accurate and note the distribution of the responses. You should check for:

- whether the total number of cases accurately reflects the total population served by the title IV-E agency during the report period;
- whether there are elements that have invalid data;
- whether years of births are appropriate for the category (e.g., one-year-old foster parents or 99-year-old foster children); and
- whether there are elements that have a high number of “not reported” or “unable to determine.”

It is also useful to note whether there is a high frequency of responses for a certain value. For example, if there are several records with the response of “not yet established” for case plan goal, it may indicate that caseworkers are not updating the information or that there is a problem in the title IV-E agency’s programming logic (see Exhibit 5, below).

Exhibit 5**Foster Care Element #43: Most Recent Case Plan Goal**

Value	Frequency	Percentage	Cumulative Pct
1 Reunify with Parent(s) or Principal Caretaker(s)	1723	52.90	52.90
2 Live With Other Relative(s)	2	0.06	52.96
3 Adoption	464	14.25	67.21
4 Long-Term Foster Care	245	7.52	74.73
5 Emancipation	426	13.08	87.81
6 Guardianship	14	0.43	88.24
7 Case Plan Goal Not Yet Established	1	0.03	88.27
Not Reported	382	11.73	
Reported	2875	88.27	

Total: 3257

The frequency report can also be used to determine data entry or procedural errors. For example, a number of foster care records may indicate that the date of the latest periodic review is 1979, but after further investigation the reviews were found to be conducted in 1997. This may be a result of data entry errors when the numbers were transposed from "97" to "79".

C. Questions to Consider

Questions similar to those listed below can be used as an aid for assessing the accuracy of the frequency report data.

- Does the data for "child's date of birth" accurately describe the title IV-E agency's foster care or adoption population? It may be an indication of suspicious data if the frequency report data indicates that children twenty-five years of age were adopted during the last reporting period.
- Does the racial distribution reflect the reviewer's understanding of the title IV-E agency's foster care or adoption population? If the report indicates that the title IV-E agency has a large proportion of "Native Hawaiian/Pacific Islander" children and there are very few or no children of this race category in the State/Tribe, then there may be a mapping problem in the extraction code.
- Is the "1st foster caretaker's birth year" realistic? Responses for this element that indicate a year such as 1901 are suspicious.
- Do the circumstances associated with removal accurately reflect the reasons children are entering foster care? If the report indicates that large proportions of the title IV-E agency's foster care population were removed for "physical abuse" only, it may be an indication of case workers not entering all relevant information into the system.
- Can changes in data between reporting periods be explained by policy or system changes? If the changes in the data can be explained by policy and/or system changes, the title IV-E agency should consider adding appropriate footnotes in the

title IV-E agency's AFCARS data file submission (see Technical Bulletin #10 on submission of file footnotes).

C-1. Relationships Between Elements

Another way of analyzing the information provided in the frequency report is to assess relationships between elements. Certain elements should have frequency responses that are similar. For instance:

- Does the number of children in non-foster home settings (foster care element #41, values 4 - 8) equal the number of responses for “not applicable” or “not reported” in foster care element #49, “foster family structure”?
- Does the number of responses for dates of birth, race and Hispanic origin in foster care elements #50 - 55, equal the total of “married” and “unmarried couples” in foster care element #49?
- What is the number of children that were removed with a circumstance associated with a disability (foster care elements #11-15) versus the number of children reported with a disability (foster care element #10)?

Other examples of elements that should be compared for having similar responses are:

- Foster care element #44 (caretaker family structure) and foster care elements #45 - 46 (caretaker date of birth)
- Foster care element #56 (date of discharge) and foster care element #58 (reason for discharge)
- Foster care element #58, discharge reason of adoption and the number of records submitted for the adoption file
- Foster care element #59 (child received title IV-E foster care) and foster care element #63 (child is receiving Medicaid)
- Adoption element #22 (adoptive parents family structure) and adoption elements #22 - 28 (adoptive parents date of birth, race and Hispanic/Latino origin)

III. Installing the Frequency Utility

A. *The AFCARS Frequency Utility Files*

The frequency utility files may be downloaded from the Children's Bureau's web page at <http://www.acf.dhhs.gov/programs/cb>. The files can be accessed through the “AFCARS Resources” page. The filenames are:

- xfreq_n.exe (executable)

- county_names (listing of valid 5 digit Federal Information Processing Standards (FIPS) county codes³)
- elements_race (listing of AFCARS data elements)

NOTE: The source code (in C+) is available upon request.

B. Installing the Software

Copy the files "xfreq_n.exe," "county_names" and "elements_race" to a directory in a PC.

The "county_names," "elements_race" and an AFCARS data file must be located in the same directory as the executable file, "xfreq_n.exe," in order for the frequency utility to work properly.

The utility program may be executed by using one of the two methods described below:

Windows Explorer

1. Click on the "Start" button on the desktop window and select "Programs."
2. Select "Windows Explorer" from the "Programs" list.
3. Select the drive name where the executable file has been loaded (i.e.: C:).
4. Select the appropriate directory name (i.e.: AFCARS).
5. Select the executable file name (i.e. xfrq_n.exe).
6. Double click to execute the utility.

Windows Run Function

1. Press the "Start" button located on the desktop window and select "Run."
2. Select the "Browse" button within the "Run" box.
3. Locate and select the drive and executable file name for the utility (i.e.: C:\AFCARS\xfrq_n.exe).
4. Click on the OK button once the executable file name appears in the run box.

Once the executable file has been initiated, the program will request that the user enter three file names:

- Input data file: The AFCARS data file name. Type in the name of the data file and press Enter.
- Output Foster Care frequency report file: The Foster Care frequency report file name. Type in the name for the foster care frequency report file and press Enter.

³ You may check the "county_name" file to make sure it has the current FIPS county codes for your State/Tribe.

- Output Adoption frequency report file: The Adoption frequency report file name. Type in the name for the adoption frequency report file name and press Enter.

The name of the output frequency report files for foster care and adoption cannot exceed 20 characters. Spaces cannot be used in the file names of the input and output files.

The executable file will read the input AFCARS data file and generate the Foster Care and Adoption frequency report file. It is important that the input AFCARS data file is created using the format as stated in AFCARS Technical Bulletin #9: File Format.

The frequency report file may be viewed using a text editor or a word processing tool, such as WordPerfect or Microsoft WORD. A non-scaleable font, Courier 12 CPI, is recommended to print the reports, so that the columns are correctly aligned, making it easier to read.
